I. Debrief Airline Panel Discussion
II. Review of Working Group Assignments
   A. Airport Experience Working Group
   B. Technical Working Group
   C. Focus Group
   D. Community Character Working Group
III. Next Steps and Vision Committee Role
IV. Adjourn
Airline Panel Debrief

What are your key takeaways from the airline panel?
Airport Experience Working Group

Based on our values, our goal of limited enplanement growth, and our goal to reduce CO2 and other emissions, what would a warm, welcoming and comfortable terminal look like?

- How could it best “fit” the community?
- What are our terminal and landside options?
- How could our building size, function, number of gates, etc. best reflect our values, planning directions and goals?
Technical Working Group

To meet our community values and goals, what is our desired "design aircraft?"

- How could the existing or future "fleet mix" meet the air pollution reduction, limited enplanement growth, and noise abatement goals established by the ASE Vision process?
- In light of those community goals, what does the future airfield look like in terms of safety and airport design?
- What are the implications of the status quo (Airport Design Group II vs Airport Design Group D-III)? Could any variations exist within these design groups that might help us attain our community goals? What should be the commercial Design Aircraft for Aspen given what aircraft are currently available and known future aircraft? For the desired Design Aircraft, does the airfield need to be ADG II or ADG III?
Focus Group

How can we improve airport connectivity?

- What would more convenient and easy ground transportation to and from the airport look like?
- How can we enhance multi-modal transportation options and create seamless connectivity to transit?
- How does the Airport fit into the broader surface transportation network of Aspen, Snowmass Village, Pitkin County and the Roaring Fork Valley?
**Community Character Working Group**

What’s the big-picture role of the Airport in our Community?

- How will our future Airport fit the ASE Vision values and the civic goals of the Aspen/Pitkin County community?
- How should these values and goals inform planning for future operations of both General Aviation and Commercial service?
Vision Committee

Understand working group deliberations.

- Attend working group meetings to observe working group conversations.
All Working Groups and Vision Committee

- How does the FAA approved forecast and design standards relate to our community values and determining future improvements at the airport?
- What can we afford? (Note: this is at the vision level, not detailed financial assessment)

Next Steps

- August 12: Airline Panel & Workgroup
- August 26: Vision Committee
- August 28: Focus Group
- August 29: Community Character
- TBD: Technical Group
- September 18: All Groups
- Sept 24 & 26: Experience Group
- October 2: All Groups
- November 13: All Groups Report Findings to Vision
- November - TBD: Vision Committee Work TBD
- BOCC Recommendations: TBD
Thank you!
